Präsentation and Workshop

VV ECMO

- Indikation
- Contra Indikation
- Way to cannulate

Breathing Mode

- ARDS
- Spontan
- Highflow/NIV

Awake or sedation

- Handle the delir
- Psychological and family support

VA ECMO

- Indikation
- Contraindikation
- Way to cannulate
- Harlequin

Monitoring/Risk

- NIRS/Kompartment/IAD/Gluteal Ischämie/Perfusion/BGA
- CVVH
- Bleeding/circuit check

Weaning

- How to wean
- Decannulation
- tracheotomie

mobilization/ fix cannula

- Mobilizing everyday
- Prone position

Troubleshooting

- Pump/oxy failure
- patient

wound/ everyday care/ nutrition

Workshop

Material to fix the cannula

- How we do
- Care prodacts

Do 135 and 180 prone position

2 Bed and 2 Teams by 3-4 people
Dummy who is Intubation (ECG/arterial line/ZVK) and cannula or Person (if no dummy)

Time 20-30 Minute an Switch

- Trubble shooting
- Reanimation

Get the Patient Ready to Ct or Transport —> bagpack, medikation, safety

Disscusion:

Common problems in the everyday care
Common problems in cannulation
